

GARUDA PURANAM.

perspiration form the principal symptoms. A child sucking breast-milk vitiated by the deranged Kaphah sutlers iron-diseases of the deranged Kaphah, and salivation (water brash) somnolence, running at the nose, flow of tears, vomiting of undigested breast-milk etc., form its main features. Diseases of infants, brought about through the agency of any two of the morbid principles of Vayu, Pittam, etc., exhibit symptoms which are peculiar to each of them. In the SS.nnipatika forms of diseases of infant life, the symptoms of all the Vataja, Pittaja and Kaphaja types become manifest in unison. The intensity of pain in the body of a child should be inferred from the pitch of its cry-sound. The use of bad breast-milk produces a kind of itching sensation in the eye-lids of infants which is called Kakunaka. Profuse tears run down from the eyes, and the child constantly rubs its forehead, nose and eyes, and becomes incapable of looking at the sun, or of opening its eye-lids. Through the use of breast-milk of pregnant mother* infants are found to suffer from a peculiar form of indigestion (lit, impaired digestion) attended with cough, vomiting, somnolence, vertigo, and bloatedness of the abdomen with a non-relish for food which is called Paribhava. The deranged and aggravated Kaphah, by lying incarcerated: about the root of the palate, produces a kind of disease in infants which is called Talu-Kantaka. The part of the head parallel to

the* roof of the palate is found to sink in this
 disease, the
 roof of the palate looks as if .it hangs down,
 and the
 child refuses to be weaned at the breast.
 Deglutition
 becomes painful, the neck oi the child droops d<
